What prompted Kanpur boy to opt for Turkey to pursue BTech degree

K eeran Thiruvengadham, 21, who was admitted in an engineering course in the UK last year, now regrets having made the choice. He is now studying his BTech (computer science) at Bosphorus University in Istanbul. His parents had been against his choice of the country, but he thought that an engineering degree from a British university would give him a competitive edge in the job market. However, he soon found that the university he had chosen did not have the same level of recognition as those in the UK. He struggled to adapt to the new environment and eventually decided to switch to a different university in Turkey.

Mukhopadhyay affirms that the MSS programme is one of the best in the world, offering students the opportunity to gain valuable experience in the sports industry. He believes that the program is ideal for students who are looking to pursue a career in the sports industry and want to gain a competitive edge in the job market. He also emphasizes the importance of developing a strong network and building relationships with industry professionals, which is something that students can do through the MSS programme.
